PRESS RELEASE

FOR IMMEDIATE RELEASE

NEW MOZAEX iPlay FEATURE ADDS iTunes MUSIC AND MOVIES

***ALLOWS PLAYING OF DOWNLOADED iTunes MUSIC AND MOVIES WITH APPLES iPhone/iPad REMOTE APP
WORLD'S FIRST MEDIA SERVER TO PLAY DISC-LOADED, STREAMING AND DOWNLOADED MOVIES***

Salt Lake City – June 27, 2011 – Mozaex™, the premiere manufacturer of multi-room, multi-media Blu-ray entertainment servers, announced today it has released a new Mozaex feature called iPlay, which allows users to browse and play their entire iTunes music and movie library on their Mozaex multi-room Entertainment Server. iPlay will be presented along with the company's family of Entertainment Servers at the Home Technology Event, Excel Center in London, UK, June 28 – 30.

All Your Movies, Music, and Online Media Playing In Perfect Harmony

iPlay combines a disc-loaded, streaming and downloaded movie/music server into one simple solution. With the Mozaex iPlay feature, all the music, TV shows, and movies purchased at Apple's iTunes Store can now be enjoyed on the user's HDTV home theater system via the Mozaex Entertainment Server.

"With iPlay, Mozaex offers for the first time the ability to play all three forms of movies and music...namely ones that are Blu-ray/DVD/CD disc-loaded, online streamed, and online downloaded," said Mozaex CEO Douglas Kihm. "Mozaex has once again set a new standard of value and simplicity in home entertainment."

Added Kihm, "When it comes to entertainment, people want the best of both worlds, namely quality and convenience. They want both the absolute highest quality that only Blu-ray 3D movies offer, combined with the instantaneous ease of online streamed and downloaded movies. iPlay Mozaex addresses this need by offering for the first time all three movie and music playback methods."

Browse and Play all of Your Entertainment Media with Apple's iPhone/iPad Remote App

iPlay also provides Mozaex users an exciting and simple new way to browse and control their iTunes library of movies and music through the use of Apple's two-way mobile App called "Remote". The Remote App is a free, fun and easy-to-use wireless App that turns a user's iPhone/iPad or iPod Touch into a full featured two-way remote control.

iPlay also includes a one-way iPhone/iPad App that provides control of the Mozaex's onscreen TV GUI so the user can browse and play other Mozaex media including photo slide shows and more than 100 channels of online media, including streaming NetFlix and VUDU movies and Pandora music.

(more)

According to Mozaex, no other iOS App offers the same rich set of features that the Apple Remote App offers. The Apple Remote App keeps iPhone/iPad and iPod Touch in sync the whole time a user's music is playing so they can instantly see what's playing with colorful cover art, create playlists on the fly, turn up the volume, and even switch and synch up multi-room speakers with its synched room party mode.

Mozaex iPlay transforms the Mozaex Server into a complete multi-room music solution that can be easily expanded with the addition of affordable Apple Airport Express wireless music players.

With Mozaex iPlay, a Mozaex System also becomes an iTunes movie server and player. With iPlay, a user can now not only watch Blu-ray/DVD loaded movies and streamed NetFlix/VUDU movies, but also downloaded SD and HD iTunes movies on a Mozaex Player, Solo, or ShowStar media server.

iPlay will be included at no additional charge on the company's entire product line beginning July 29th. A free* iPlay update disc, (*not including shipping), will also be available to authorized Mozaex dealers to update any X7 OS system. A one-time \$99 user setup fee will be charged by the dealer or Mozaex for setting up iPlay on the newly released plug-and-play ShowStar Series. The Apple Remote App is free and available on Apple's iTunes store.
