**MOZAEX™ ANNOUNCES IPHONE, CONTROL4,  
SAVANT, NETSTREAMS, RTI MODULES**

*EXPANDS ITS LIST OF CONTROL MODULES FOR ITS BLU-RAY ENTERTAINMENT SYSTEM*

**Salt Lake City – August 16, 2010** – Mozaex™, the premiere manufacturer of multi-room, multi-media Blu-ray Entertainment Servers, has announced it has added iPhone/iPad, Control4, Savant, NetStreams, and RTI to its growing list of leading control modules.

Mozaex will be demonstrating at the 2010 CEDIA Expo being held from September 23-26 at the Georgia World Congress Center (Atlanta, GA), booth #3844.

“The addition of these new control modules further bolsters our leading position in providing the widest selection of one- and two-way interfaces available for a Blu-ray Entertainment Server,” said Mozaex CEO Douglas Kihm.

Mozaex may be controlled a variety of ways including the Mozaex IR remote and a wide selection of universal remotes and control systems from companies such as Crestron, AMX, Elan, HomeLogic and Vantage among many others. A Mozaex Server is required for some two-way touch panel control systems while all one-way and semi two-way modules do not require a Server.

“All control modules include a one-way interface to control the Mozaex on-screen TV GUI, or ‘MOZI’, as would a hand held remote control,” Kihm explained. “Some control modules also offer a two-way interface which retrieves and displays the cover art and metadata of the user’s media collection of movies and music on the Touch Panel.”

Others, Kihm continued, such as iPhone, Control4 and NetStreams, offer a “semi two-way” which provides both a one-way interface and a two-way music-only interface. The Semi two-way Music interface is a popular common choice since, except for music, the TV normally needs to be turned on to watch a movie or play other media such as a photo slide show or online streaming video channel such as HULU or MTV.

With Mozaex’s broad selection of control modules, the dealer can configure the Mozaex system with the control system that most cost effectively meets a specific customer’s needs.

*(more)*

All Mozaex Remote Control Interface software “modules” are available at no charge to authorized Mozaex dealers.

Most modules are available via the Mozaex private dealer web site except for Savant module which is expected to be available from Savant on September 10, 2010 and the iPhone App which is expected to be available by October 31 2010.

## **ABOUT MOZAEX**

Mozaex was formed by the founder of Axonix® - MediaMax™ with the goal of delivering the world’s finest and most reliable Blu-ray™ Entertainment Server. With over 27 years of experience the two companies have delivered tens of thousands of media sharing solutions to companies such as Dell®, Gateway® and NEC® plus over 5,500 Media Players to hundreds of custom home electronic integrators. Mozaex is a multi-room media server that can load, store and instantly deliver 3D Blu-ray movies, DVD movies, music, photos and online content. Combining elegant operation with uncompromised reliability and quality, Mozaex has quickly become the solution of choice for homes and yachts around the world. Mozaex is sold exclusively through a network of over 650 dealers that are serviced by 10 USA/Canadian rep firms and 16 international distributors in 20 countries.

Disclaimer - The Mozaex System is only shipped with licensed movie decryption software for playing back physical DVD and Blu-ray movie discs and thus may not be able to load or play some or all DVD and Blu-ray movies. Mozaex does not make, ship, offer or induce the use of any unlicensed decryption software. It is the user’s sole responsibility to obey any and all related copyright laws.
